

CLOVERMEADOWS

HEALTHCARE + REHABILITATION
COVID-19 UPDATES, MESSAGES, AND STATISTICS

Dear Families,

We hope you are staying well and healthy . Please see the following updates and feel free to reach out to us with any questions you may have.

Indoor Visits/Outdoor Visits

Please be advised that per CDC and DOH guidelines outdoor visits are still recommended weather permitting. If the resident is in a private room in-room visits will be allowed. We are also expanding visitation slots for residents and visitors. We are recommending the residents be brought outside to the patio for visitation to ensure proper social distancing. If the resident is unable to leave the room and the roommate consents (and no other location is available) the visitor will be allowed to visit in the room as long as the visitor and residents are vaccinated. Also please note that indoor visits may be canceled if the county positivity rate climbs or we re enter an outbreak stage. Please note that cases in New Jersey have begun to rise again. We ask all family members to be conscious of the safety of their loved ones and the rest of the residents and follow all safety precautions. We strongly recommend you get tested prior to visiting.

1. Please call the front desk to reserve a time.
2. A party must consist of no more than (2) persons.
3. The visitation must be scheduled in advance by calling (609)846-1494. This gives us ample time to brief visitors regarding the facility's protocols.
4. At the designated visiting time,

- a. The visitors' temperature will be taken and each visitor will be asked to sign a consent form. You will then be ushered to the designated visiting area.
 - b. The resident will be positioned , no less than 6-feet away and will be accompanied by a staff member.
 - c. Both parties must be masked at all times.
 - d. If both resident and visitor are vaccinated, they may remove the face masks and have close contact when alone in their room.
 - e.
5. For all new residents/patients, visitation can be scheduled 14 days after their admission date.
 6. For visitors coming from states included in the NJ travel advisory list, your visitation can only be scheduled after the completion of a 14-day quarantine period upon your arrival to New Jersey.
<https://covid19.nj.gov/faqs/nj-information/travel-information/which-states-are-on-the-travel-advisory-list-are-there-travel-restrictions-to-or-from-new-jersey>
 7. Rights to visit may be revoked at any time should the authorized visitor fail to comply with the necessary guidelines

We continue to follow protocol to prevent and contain the virus. The following are some of the protocols we have in place, all staff educated & re-educated on infection prevention and control, any patient with covid-19 are in a dedicated area, monitoring all residents for signs and symptoms of COVID-19, visitor restrictions, screening staff and anyone else entering the building, small “socially distant” group activities, face coverings at all times, sanitizing frequently touched areas. As a precautionary measure, we are treating all new admissions as if they have been exposed. They are located on their own unit until a 14-day quarantine has been completed. Residents will be tested weekly until there has been 14 days with no new positive cases in staff and residents. Staff will continue to be tested on a weekly basis. Any staff member with covid-19 or covid- 19 symptoms will not be allowed back to work until they meet the requirements set forth by the NJ Department of Health.

Rest assured that we, at Clover Meadows, will always have your loved one's best interest at heart and we hope that you are staying safe as well. We thank you all for all the words of encouragement and overflowing show of love and support. It surely keeps us going. We will be keeping you updated, and know that you can always reach out to us should you have any questions or concerns.

Please note we will continue to send these updates at least weekly which will include confirmed or suspected COVID-19 activity at the facility and mitigating actions we are taking to prevent and reduce the risk of transmission.

Should you request any additional information on any changes to COVID statics you can contact Shantel Rodrigues AT 1-609-886-1494-DIRECTOR OF NURSING.
